<u>Final Project Proposal</u>

Group Members:
- Jamie Mariz Laudencia
- Hao Mai
- Tony Doan
- Jennifer Nhu

Project Idea: Social Media Web Application (using python (Flask)) hosted live

- 1-User will sign up and login to account (with hashed/salted passwords)
- 2-User will be able to create new post with some description and an image
- 3-User will be able to write his status
- 4-User will be able to see all the statuses and posts of other users
- 5-User will be able to like posts of others
- 6-User will be able to share posts of his and others to anyone
- 7-User will be able follow or unfollow other users
- Conclusion: User will be able to access information about themselves or others from the database through the server from the front end
